The Planning Board shall not recommend and the City Council shall not grant a request for a Conditional Use unless the requested use is (1) not detrimental to the public health or general welfare; (2) is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal and similar services; and (3) will not violate neighborhood character and not adversely affect surrounding land uses. **To that end, the ordinance specifies criteria and standards that, when satisfied, allow the granting of the Conditional Use. In the spaces below, provide your responses as to how you believe your proposed project satisfies each of the standards. (Attach additional sheets as necessary.)**

The Planning Board and City Council must find that ALL of the standards are met and may impose specific conditions to assure that the proposed use and its location will be harmonious with the area in which it is located and with the spirit of the zoning ordinance and to insure that the proposed use will not be detrimental to surrounding environment and property values.

Criteria for CUP approval

(1) The proposed conditional use will comply with all height, yard, lot and area requirements and other regulations for the district in which it is located unless otherwise specified.

(2) All driveways will be designed with respect to such matters as proper ingress and egress for automobiles in order to minimize traffic congestion and increase pedestrian safety and conveniences.

(3) Off-street parking will be provided in compliance with Section 1000 and off-street loading will be provided in compliance with Section 1001 of Lenoir’s Zoning Ordinance.

(4) The establish of the conditional use will not hinder the normal and orderly development and improvement of surrounding property for uses already permitted in the district.

(5) Any required screening and landscaping will be designed or planted with full consideration of the effectiveness of individual plant types, dimensions, and characteristics in minimizing the noise, glare, visual impacts and other economic effects on adjoining properties.

(6) Any permitted signs and proposed exterior lighting will be designed to reduce glare and to mitigate any adverse effects of sign size and height; so as to make the signs aesthetically pleasing and compatible with adjoining properties.

(7) The exterior architectural appearance and function plan of any proposed building or structure will not vary greatly from any buildings or structures already constructed or in the course of construction in the immediate vicinity or from the character of the applicable district, so as to cause a substantial depreciation in the property values of the immediate vicinity.

(8) The type, size, hours of operations, location of the use upon the site, and intensity of the proposed conditional use will not be harmful or annoying to surrounding properties.
